PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience building responsive, accessible and scalable web applications using React.js, JavaScript and modern frontend technologies. Experienced in developing multilingual enterprise platforms, reusable UI components and internal automation tools that reduced manual effort by up to 90%.

EDUCATION

Bachelor of Science in Information Technology

August 2019 – June 2022

University of Mumbai

PROFESSIONAL EXPERIENCE

Web Publisher | Frontend Developer April 2023 – Present

Lionbridge LLC | Thane, Maharashtra, India

- Engineered and maintained multilingual enterprise web platforms using React.js, Oracle Commerce Cloud (OCC) and SDL Tridion, delivering responsive, accessible and localized experiences for global audiences.
- Optimized content publishing workflows, reducing delivery time by 30% while maintaining brand consistency, accessibility and quality standards across enterprise web platforms.
- Collaborated with designers, backend developers and project managers across time zones to deliver complex web releases with 100% on-time delivery.
- Managed daily content updates, bug fixes and maintenance for multiple high-traffic enterprise websites, ensuring cross-browser compatibility, responsive behavior and consistent user experiences across platforms.
- Mentored and onboarded multiple team members, supporting their ramp-up and knowledge transfer while ensuring consistent project execution and delivery.

Internal Automation Tools – Built & Owned End-to-End

- Address Automation Tool (OCC):** Automated bulk creation of shipping and billing addresses in Oracle Commerce Cloud, reducing manual effort by 90% which includes pause, resume and stop controls, automatic error detection, and a scan feature to review all addresses and selectively remove them.
- Spec Scraper Tool:** Automated tool that fetches product specifications from source pages and maps each value to the correct specification field, including multilingual content. Reduced manual processing time by approximately 60% and eliminated manual translation and specification-matching effort.
- Credential Manager:** Centralized credential storage for 150+ sites, each with unique logins. Tracks the 90-day password expiry cycle with timers and autofill login forms, improving credential-handling efficiency by about 20%, and avoiding expired password lockouts.

Frontend Developer June 2022 – February 2023

Bloombytes Private Limited | Mumbai, Maharashtra, India

- Developed and maintained responsive React.js interfaces that boost user engagement and improved usability across devices.
- Built and maintained reusable component libraries, improving UI consistency and reducing development time by 20% across multiple projects.
- Applied Git version control best practices, enabling efficient collaboration and streamlined deployments within agile teams.
- Integrated React frontends with Laravel backends and MySQL databases, ensuring seamless data flow and reliable application functionality.

- Performed thorough testing and debugging for cross-browser compatibility, responsiveness and performance, improving reliability and user satisfaction.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Hooks, React Router, GSAP, Framer Motion, Redux Toolkit, Responsive Design, Cross-Browser Compatibility

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, MySQL, Python, JWT Authentication, Google OAuth, Stripe Integration

CMS & Platforms: Oracle Commerce Cloud (OCC), SDL Tridion

Tools & Practices: Git, Vite, Postman, Figma, JIRA, Browser Automation, Prompt Engineering

Languages: English, Hindi, Marathi, Oriya

PROJECTS

Dwaarper – Service Booking Platform | *MERN Stack, Stripe, Tailwind CSS, GSAP*

Live: dwaarper-wow5.onrender.com | **GitHub:** github.com/DkDash10/dwaarper

- Built a full-stack service booking platform with React.js, enabling customers to discover services, select dates and times, choose available professionals, complete Stripe Checkout payments and track bookings through their lifecycle.
- Implemented secure authentication with bcrypt-hashed passwords, JWT and Google OAuth (Passport.js), plus protected routes and profile management.
- Developed availability logic based on professional skills, working hours, durations and booking conflicts, with capacity reservation to prevent double-booking.
- Created a background lifecycle service that auto-assigns professionals after payment and retries every 5 seconds across statuses from confirmed to completed.
- Delivered cart, booking history with filters and pagination, and server-side validated forms.

Progresssys – Corporate Landing Page | *React, Vite, GSAP, Matter.js*

Live: progresssys.onrender.com

- Developed a responsive single-page website for business consultancy, covering services, team, blog highlights and contact sections.
- Built an animated hero with motion-driven text and video background using GSAP, and interactive physics-based visuals using Matter.js.
- Built a reusable React component structure with React Router, enabling maintainable navigation and efficient updates across the single-page experience.

Sushiman – Restaurant Landing Page | *React, Vite, Tailwind CSS, Framer Motion*

Live: vitesushi.netlify.app | **GitHub:** github.com/DkDash10/sushiman

- Designed and built a mobile-first landing page with hero, menu categories, popular dishes, signature drinks and newsletter signup.
- Added scroll and entrance animations with Framer Motion and AOS for an engaging, polished user experience.
